Product Description:

Unlike other Slimline towels on the market, RapidClean P2P Slimline shows that being cost effective doesn't always mean forfeiting quality. This product is engineered using new innovative 'point to point' (P2P) technology that enables us to bind two plies of towel together and create a series of small air pockets within each sheet. These small air pockets allow the towel to absorb at phenomenal rates whilst offering superior softness to most towels on the market.
